

## Technical Data Sheet

### CRAMOLIN KABEL-GEL Art. No.154

#### Product description

KABEL-GEL is silicone-free and simplifies and speeds-up the sinking of wires in tubes and ducts. KABEL-GEL does neither bond nor dry-out and helps therefore to prevent damages on wires. KABEL-GEL does not attack the plastic and is biodegradable.

#### Application

Protects cables and wires against damage on cable sheaths  
Improves the lubrication also at low temperatures  
No cementation of pipes and tubes  
Economical in the application  
Washable  
Very good skin compatibility  
Ready for use  
High temperature, resistance up to 80 ° C  
Non-flammable  
Harmless ingredients  
No hazardous materials or dangerous goods  
Biodegradable  
Silicone free

#### Please note

KABEL-GEL simplifies and speeds up the insertion of cables and wires in electrical installation tubes.  
KABEL-GEL decreases the friction of cables and wires in tubes.  
In case of its water-based formulation KABEL-GEL does not attack all established cables, tubes or pipes.  
KABEL-GEL avoids damaging to cables and cable sheaths.  
KABEL-GEL is specially designed for the application in installation areas.

#### Technical Data

Color:	colorless
Density:	0,99 [g/cm <sup>3</sup> ]
Viscosity:	gel
Odor:	odorless
Temperature resistance:	up to +82°C
Packaging size:	1050ml
Units/box:	12 bottles 1050ml

#### Storage / Shelf life

Shelf life is 2 years if stored correctly.  
Package after emptying to be disposed via metal scrap.
